

STATISTICAL MODELLING

Based: Exeter

ATASS Sports is a statistical research consultancy providing high quality modelling and analysis for the sports industry. We combine expertise in statistical analysis and research with in-depth sports knowledge, and dominate the sports modelling industry in the UK and abroad.

We are seeking highly motivated individuals to join our research and analytical teams. Successful applicants will work within new and established multi-skilled teams to develop novel statistical models, incorporating real-time information, in order to enhance understanding of the complex relationships inherent in competitive sports. As a minimum, applicants should have (or expect) a good first degree in statistics or a similarly numerate subject, but a postgraduate qualification in statistics would be an advantage.

We would expect applicants to have four or more of the following:

- good first degree in a numerate subject with an interest in statistics
- post graduate qualification in statistics or a closely related subject
- experience in programming
- ability to quickly learn and apply new statistical and computational techniques
- understanding of probability in relation to sporting outcomes
- interest or involvement in a variety of sports
- ability to work effectively as part of a multi-disciplinary team

All posts are at our state-of-the-art office complex in Exeter Business Park within easy access of the lively city centre and just minutes from the National Parks and surfing beaches of Devon.

If you like the sound of this, then further information can be found on our website – www.atassltd.co.uk – or by contacting Richard Hill on (01392) 440 408 or rich.hill@atassltd.co.uk .

ATASS encourages applications from all suitably qualified individuals.
